THE TRUE COSTS OF A KITCHEN

We are often asked **“What does a kitchen cost?”** Phrased as-is, that’s a tough question. In actuality there are hundreds of factors that contribute to the cost of a kitchen. At Cabinets Plus we like to approach that question by asking our customers, **“What do you want from your kitchen?”** This answer alone helps us tailor a kitchen design plan and estimate uniquely for them.

Some customers, however, may not be ready to articulate exactly what they want yet. For them, our approach starts with an education about the various options and drivers of cost. Our unique approach rooted in a commitment to quality and passion for coaching you through the kitchen design journey is what sets us apart from the rest.

Cabinets Plus offers a full range of products to fit almost any budget but the intangibles remain steady throughout any project. What do I mean by “intangibles”, well simply put, it’s the experience and attention to detail that has been the signature of Cabinets Plus throughout its 25 years of business.

QUALITY

From products and design, to service and communication, we have been one of the top design studios on the East End of Long Island for almost 3 decades. Our NKBA accredited Certified Kitchen Designers are able to match your vision with personalized design and high quality products. Whether you are seeking the unique luxury of custom cabinetry or require an imaginative design that caters to a modest budget, Cabinets Plus has the tools to make your vision a reality. When it comes to service our clients will attest, time and time again, that our eye for design and attention to detail is second to none. Whatever your project entails, Cabinets Plus has the right fit and the service you can come to expect when dealing with our celebrated team.

DESIGN & ENGINEERING

Although options for cabinetry, hardware and fixtures abound, a team that consults with the client and listens to their wants & needs is much harder to find in the retail model of today. Kitchens should be designed around the family dynamic, sharing a sense of understanding of how a space will be used, and what makes it appealing to them. When our talented designers are involved with a client it becomes a bond that exists throughout a project. Our clients trust our decisions and designs, we take pride in creating our clients kitchen, and being a part of their lives.

During the design it is imperative to consider each kitchen zone. Engineering the details fully enables your project to run seamlessly from design to install; every item is painstakingly planned and researched to drastically reduce issues down the road. As a small firm Cabinets Plus works proactively to get it right the first time.

"Jim and I want to thank you for the job you did with our kitchen. It is truly beautiful and exactly what I hoped it would be. We will enjoy using it for our family for many years! You were just great to work with, very patient and attentive to our needs and always made me feel confident I getting it just right. We love it. Thanks for all your help." - Jim and Terry

"Thanks so much for the unexpected package. We appreciate your thoughtfulness but most especially we appreciate our cabinets. The breakfast nook with the window seat is one of our favorite places." - Lori and Karen

*"The kitchen was beautifully designed, perfectly installed and the final product is one we are thrilled with. You made sure we were completely happy with the entire design. Many thanks from both of us."
- Barbara and Vincent*

THE UNSEEN DIFFERENCE

Simply stated, a quality product along with an unparalleled attention to detail and service is what you pay for. When cabinetry, counter tops and accessories are all delivered and installed by Cabinets Plus you have no issues or responsibilities.

Site visits occur on an average of 2-5 times before we even place the order. Once the order is placed we visit the site again to confirm that nothing has changed or been overlooked since the order was placed. Installation is performed by some of the best local craftsman the industry has to offer. Our team of allied professionals and craftsman work as hard as we do to achieve the same goal of perfection.

Typically the most valuable asset any family has is their home. When taking on a project that transforms the way you live, and may only happen once in a lifetime, the choice is clear. Dream kitchens are best realized through the collaboration of true professionals at Cabinets Plus.
